

Changes in Provision of Solid Waste Removal Services Explained

There have recently been some significant changes in the Bixby area relating to the provision of solid waste (trash) removal services. These involve a consolidation of services by formerly several providers, into service now by a single firm, American Waste Control, Inc., on each side of the river. Meanwhile, both American Waste Control and Owens will continue to offer trash removal services south of the river. These changes are entirely a function of free market forces, and something over which the City of Bixby has no authority or control.

That said, in an effort to assist local residents, the City of Bixby has obtained from American Waste Control the attached information explaining their new services. We trust it will help you understand their recent changes in trash removal services. Any questions regarding the firm's materials and their related new policies should be directed to American Waste Control, Inc., at their main line at (918) 582-1147.

To the Homeowners Association Board:

RE: New Trash Service

There are great things coming to your neighborhood. American Waste Control, a previous provider to several of your residents, is now servicing your entire neighborhood. And, we couldn't be more excited!

Here are some benefits you can expect from being an American Waste Control customer:

- Curbside recycling will be available to all residents. This One-Cart system allows for the recyclables to be placed in the same cart as the bagged trash.
Benefit:
 - Does not require extra carts, no extra pickup days, and no additional trucks on your streets.
 - Your trash and recyclables are taken to Mr. Murph, a new 10 million dollar MRF (Materials Recovery Facility) owned by American Waste Control.
 - Now everyone has the ability to recycle and help our environment with **no additional cost**.

- We are scheduled this year to bring a brand new truck to service your neighborhood. This is a state of the art collection system costing over \$300,000 dollars.
Benefit:
 - No more oil leaks and no wet spots on the road from leakage during the collection process.
 - Safer and quieter operation designed for residential environments.

- Efficient, once a week service with a single truck.
Benefit:

- Saves wear on the streets, reduces accidents and noise to homeowners, plus makes your neighborhood safer for children at play.
 - Reduces number of days unsightly containers are set out for pickup.
 - Cuts carbon pollution by 75% as compared to twice a week service.
 - Studies show on average there is less than 50% participation for second day pickup and the volume of total trash is less than 30%. All major cities have adopted this schedule, including Tulsa.
- A company sized to meet the demands of your residents.
Benefit:
 - With over 80 trucks and 100 drivers, you will never miss a pickup day.
 - We have an office staff ready to answer your call (no voice messages or automated attendant) and help you with all your disposal needs.
 - Our commitment is to this community and the people of this area.
Benefit:
 - This year we are providing at NO COST to your neighborhood a 30 yard roll-off container to be used as the HOA determines. This could be a free residential disposal day or cleanup of common grounds. This is over a \$400 value.
 - We support your local groups, charities and events.

We have been your neighbors for over 40 years, starting in the early 1970's as a local residential trash hauling company. Today, we are a growing company in the Tulsa area, but still local—providing hundreds of jobs to those in our community.

Thank you for the opportunity to service you. We are proud to be a part of your life through our waste and recycling services. If you have any questions, please do not hesitate to call us at (918) 446-0023 or visit us at www.americanwastecontrol.com.

Kind Regards,

Tom Hill

Payne's Refuse Service – May 01, 2013

Portions of Owens Trash Service – July 01, 2013

You CAN Make a Difference

One cart recycling, gives you an easy way to protect the environment by recycling at no additional cost and with the convenience of curbside pickup.

Simply place all your loose recyclables into your city trash cart along with your bags of trash and wheel it out to the curb. We handle it all—including plastics #1 and #2.

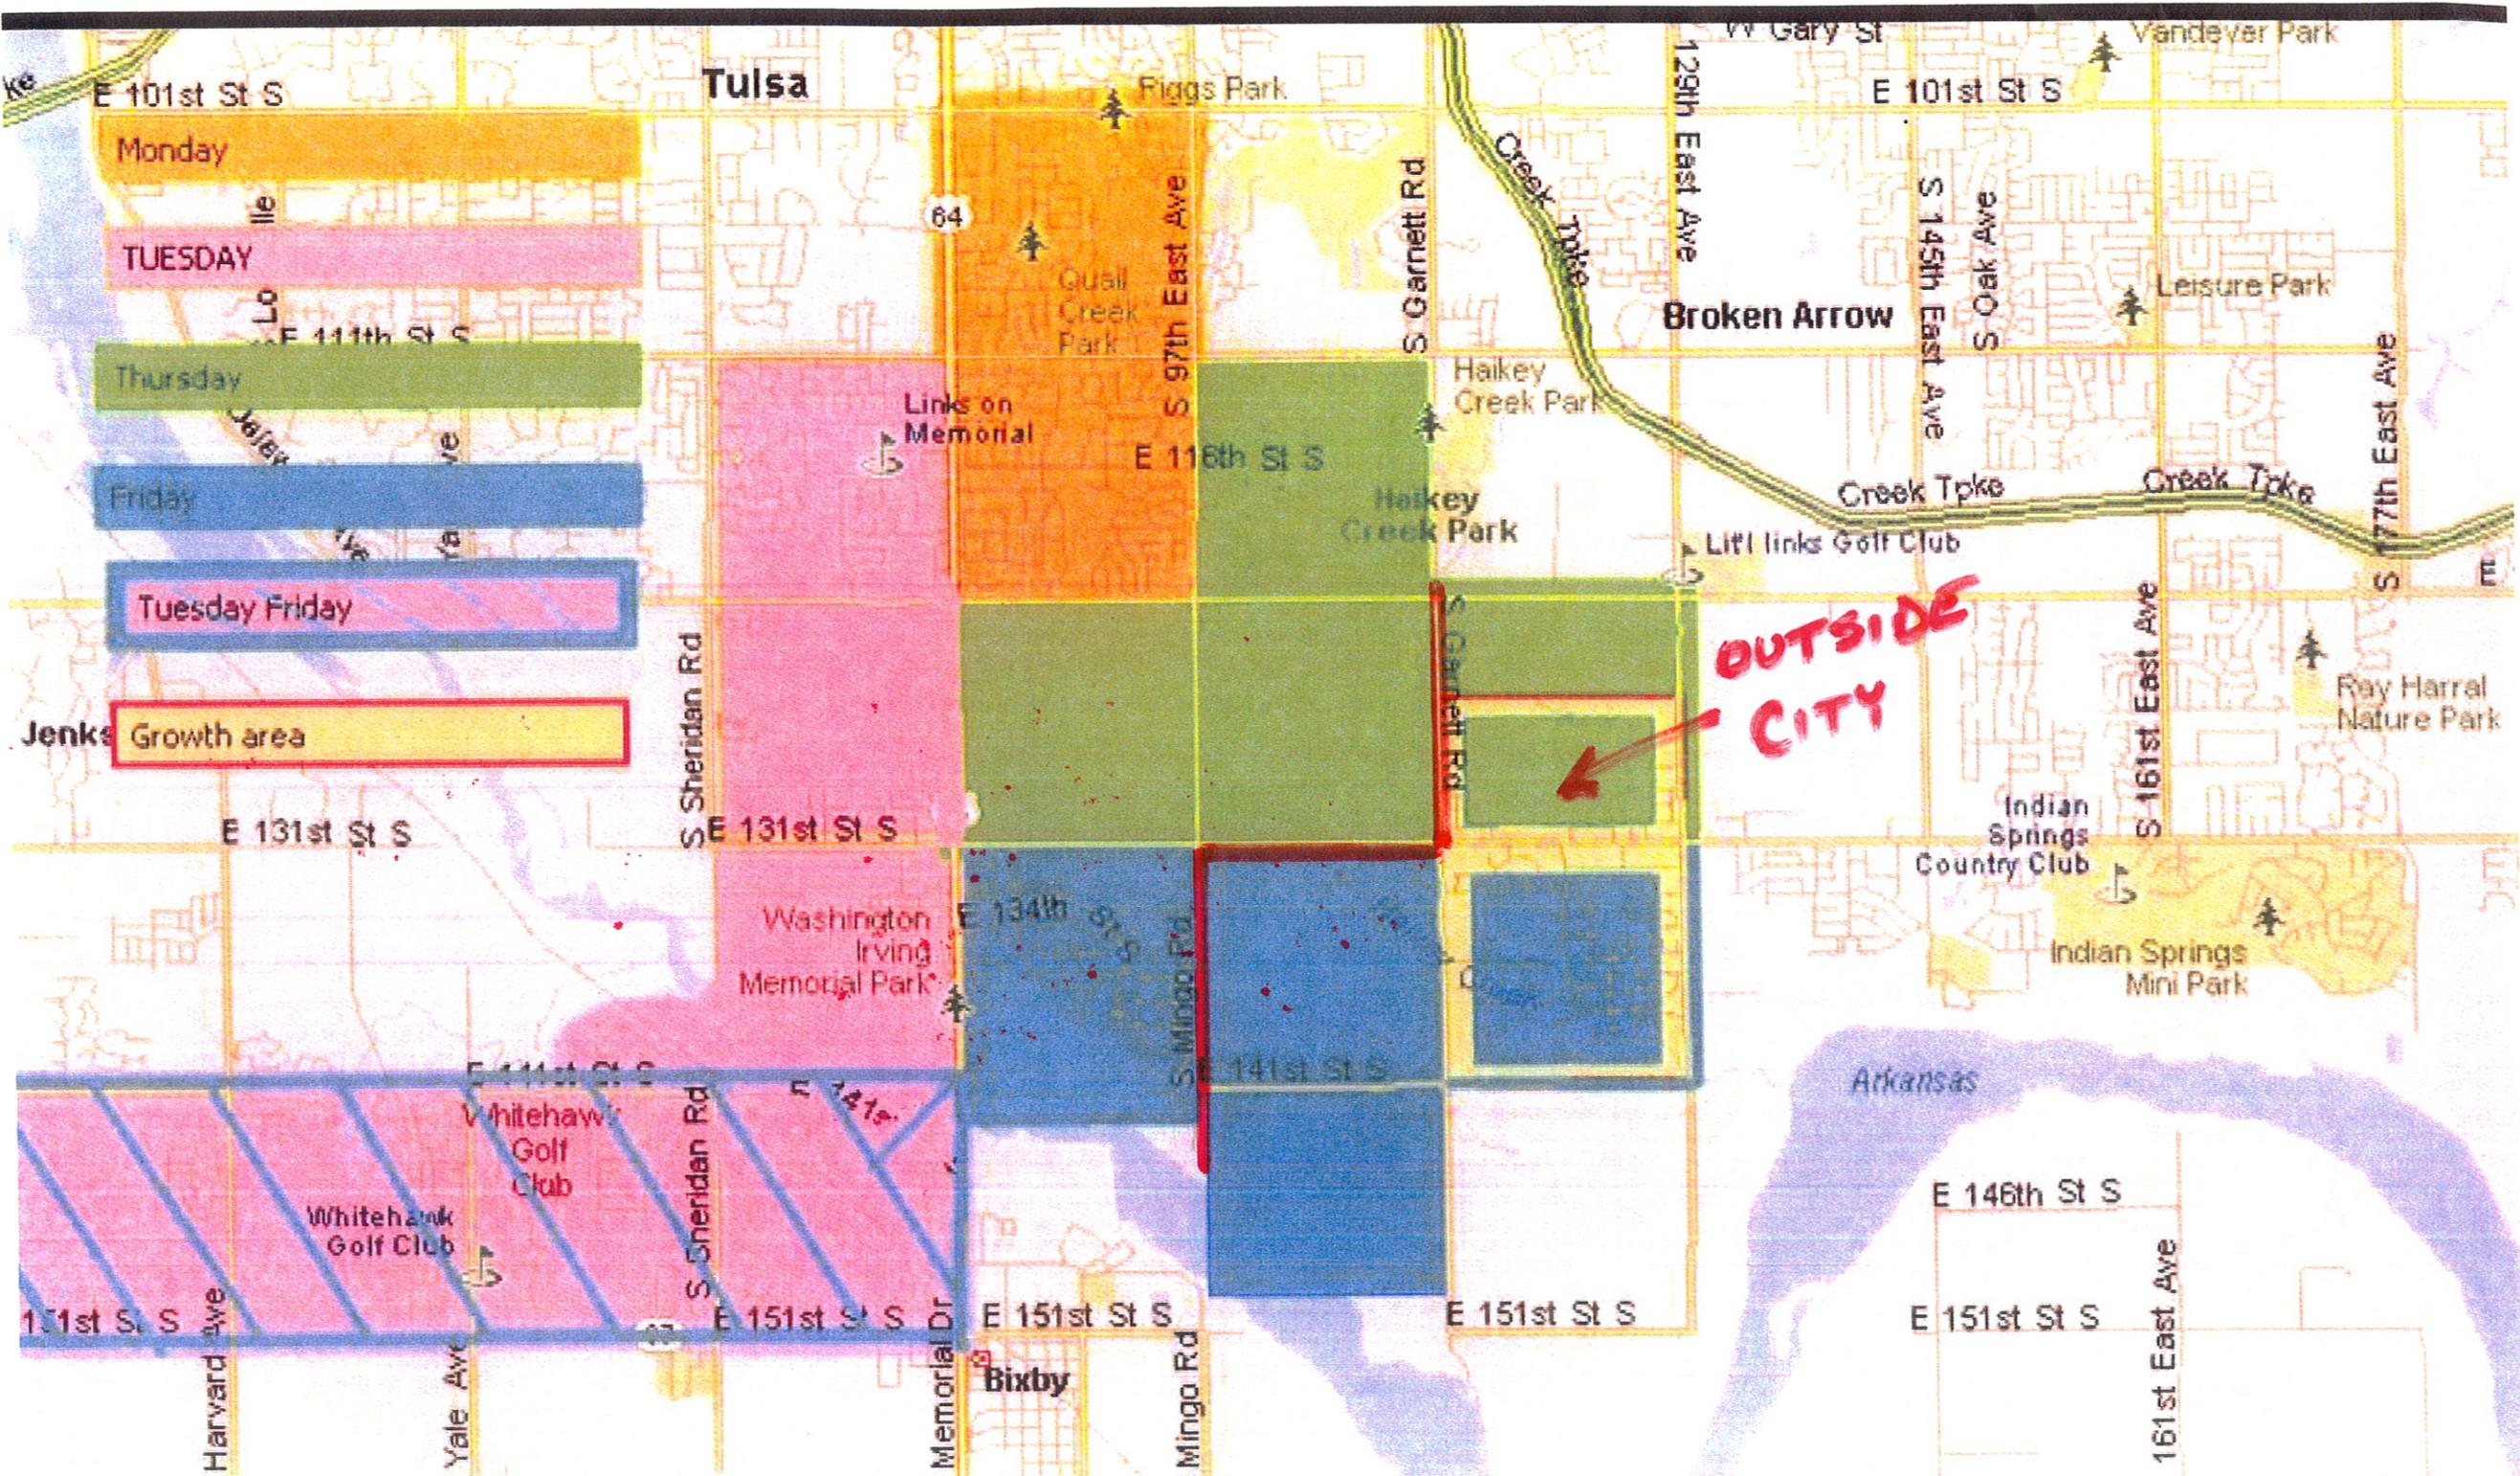

The trash is converted into energy at our landfill and the recyclables go to the recycling facility still mixed, where an advanced recyclables sorting machine (Mr. Murph) separates the different materials. For more information, visit www.feedmrmurph.com

One Cart Does the Job.

Quick Tips:

- Make sure you **bag your regular trash before placing them in cart**; recyclables should remain loose.
- Rinse food waste and other contaminants from your recyclables.
- No glass.
- We Recycle: Aluminum, paper, cardboard, plastics #1 & #2, and food cans.
