BIXBY, OK 74008  
(918) 366-4430  
(918) 366-6373 (fax)

## MEDIA RELEASE:

Date: July 29, 2013

### *City Devising Multi-phase Storm Damage Response Plan*

The City of Bixby is in the process of executing a multi-phase storm damage response plan.

Since the storm event and for the next several days, City crews are clearing debris that poses an immediate safety risk due to proximity to roadways and/or drainage facilities.

Concurrently, City personnel have been working on obtaining approval from ODEQ on a debris management site. This site will be made available to Bixby residents for storm debris drop-off at no charge. The public will be notified regarding the site location and hours of operation upon approval by ODEQ.

The City does not operate a solid waste division and therefore does not maintain the staff or equipment for a curbside pick-up program. During the 2007 Ice Storm, Federal assistance through FEMA provided funding for Tulsa County to provide curbside debris pick-up in Bixby. However, with this event, citizens are encouraged to contact their private solid waste hauler to make arrangements for curbside pick-up at their residence, or to transport their debris to the disposal site provided by the City upon its activation.
