MEDIA RELEASE:

Date: August 1, 2013

City Storm Damage Response Plan

The City of Bixby has completed Phase 1 of its storm damage response plan and is set to initiate Phase 2 next week.

Phase 1 consisted of City crews clearing debris that posed an immediate safety risk due to proximity to roadways and/or drainage facilities.

Phase 2, opening a debris management site, will begin on Tuesday, August 6, 2013. At this site, Bixby residents may unload tree debris from the recent storm events. City crews will be managing the site and consolidating the debris.

The debris management site will be open weekdays between 7:00 AM and 7:00 PM from August 6, 2013 through August 30, 2013. The site will also be open between 8:00 AM and 4:00 PM on Saturday, August 11th, 18th, and 25th. The site will be closed on Sundays. This site will be made available to Bixby residents for storm debris drop-off at no charge. Tree debris only will be accepted at the site. Patrons must present a recent Bixby water bill for site admittance.
